

SCHEME OF INSTRUCTION AND SYLLABI

B.TECH DEGREE IN

Electrical Engineering

(Department of Electrical Engineering)

AS Per NEP2020

EFFECTIVE FROM 2022-2023

National Institute of Technology Delhi

(NIT DELHI)

Department of Electrical Engineering
National Institute of Technology Delhi

1.1 About the Department

Department of Electrical Engineering (EE), National Institute of Technology Delhi was established in 2010 under the aegis of Ministry of Human Resource and Development (MHRD), Govt. of India. Currently it is offering one Undergraduate (B. Tech) course and one Postgraduate (M. Tech) courses in Power Electronics & Drives. The Department also offers PhD programme in relevant areas. The department is equipped with state-of-the-art facilities to carry out research work at all levels. The research focus of the department is in the area of power system reliability, power electronics, renewable energy systems, power systems, control/time delay systems, pattern recognition, image processing etc. The department also actively involved in multi-disciplinary research activities. The UG program is embraced by rigor and span to prepare a practicing engineer for a lifetime of creative work and ongoing technical learning. The department provides healthy & competitive environment for all round development of students leading to several remarkable achievements in GATE, CAT, GRE, TOEFEL, PSUs etc. The department has laboratories, equipped with latest equipment and software platforms, to impart state-of-the-art technical knowledge. The department aims to setup new laboratories such as Green Energy Technologies, Digital Control & FPGA Design, Biometric etc. The Department has active collaborations with Institutes & research institutes in India and abroad.

The Department of EE has a blend of young as well as experienced dynamic faculty members and is committed to provide quality education and research in the field. Faculty members of the department have excellent academic & research credentials and published numerous peer reviewed journal articles/ papers, Books, Book Chapters etc. in diversified field and having adequate experience in advanced research. The department hopes to achieve the national goals and objectives of industrialization and self-reliance. As a result, it hopes to produce graduates with strong academic and practical background so that they can fit into the industry immediately upon graduation.

1.2 Vision

- To excel in education, research and development services in electrical engineering in tune with societal aspirations.

1.3 Mission

- Impart quality education to produce globally competent electrical engineers capable of extending technological services.
- To create entrepreneurial environment and industry interaction for mutual benefit.
- To be a global partner in training human resources in the field of power and energy systems.
- Nurture scientific temperament, professional ethics and industrial collaboration.

B. Tech. (Electrical Engineering)

2.1 Preamble

B. Tech. (Electrical Engineering) program offered at NIT Delhi is designed to equip students with a unique blend of skill sets that include:

- Strong theoretical foundation
- Predominantly practice-oriented approach with access to well-equipped and specialized laboratories, and supervised internship via the Practice School
- Hands-on technical training
- Life skills orientation
- Hard and soft skills
- Business perspective, along with emphasis on innovation and entrepreneurship

2.2 Salient Features

- Minimum Credits requirements for completion of B. Tech program is 160.
- The Curriculum is based on the guidelines of National Education Policy (NEP) – 2020.
- The curriculum has embedded the Multi Exit/ Multi Entry in the B. Tech program.
- There is provision of Major degree and Minor Degree for students.
- The curriculum is designed to meet the prevailing and ongoing industrial requirements.
- The curriculum includes Project based Education with Projects every year.
- The curriculum is flexible and offers Choice Based Credit System (CBCS).
- The curriculum inherits the Value based Education and offers Interdisciplinary/ Multidisciplinary Courses.
- The Curriculum offers Digital Pedagogy & Flipped Learning with adequate motivation for Entrepreneurship/ Startups.
- The curriculum aims the Holistic Development of the students.

2.3 Cardinal Mentions

- Students exiting after completing 1st Year, 2nd Year and 3rd Year will be awarded Certificate, Diploma and Advanced Diploma in Electrical Engineering respectively. A minimum Credit requirement for Certificate is 40 Credits, Diploma is 80 Credits and Advanced Diploma is 120 Credits respectively.
- The students can opt for Minor Degree across any specialization offered in the Institute from 5th Semester e.g. a student pursuing B. Tech. (Electrical Engineering) may opt for Minor Degrees offered by the different Departments in the Institute depending upon his/her interest.
- The students opting for Minor Degree will have to earn additional credits for the Minor Degree as per Institute norms which may vary from time to time.

2.4 Program Educational Objectives (PEOs)

| | |
|--------------|--|
| PEO-1 | Engineering Graduates will excel in Electrical fields both in the industry and academics by analyzing the requirement technically and applying their knowledge in a professional manner. |
| PEO-2 | Demonstrate multi-disciplinary knowledge and skills to analyze, interpret and create solutions to the real-life electrical engineering problems. |
| PEO-3 | Apply the knowledge of electrical engineering to solve problems of social relevance pursue higher education and research. |
| PEO-4 | Engage in lifelong learning, career enhancement and adopt to changing professional and societal needs. |

2.5 Program Outcomes (POs)

| | |
|--------------|--|
| PO-1 | Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. |
| PO-2 | Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. |
| PO-3 | Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations |
| PO-4 | Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. |
| PO-5 | Modern Tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations. |
| PO-6 | The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice. |
| PO-7 | Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. |
| PO-8 | Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice. |
| PO-9 | Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. |
| PO-10 | Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| PO-11 | Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments. |
| PO-12 | Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. |

2.6 Program Specific Objectives (PSOs)

| | |
|---------------|--|
| PSO -1 | Analysis, synthesis and design of electrical equipment and systems to enhance the quality of human life. |
| PSO -2 | Development of innovative and environment – conscious technologies to sustain human life. |

B. Tech. (Electrical Engineering) Semester wise Credit Structure

| Sl. No. | Courses | Credits | | | | | | | | Total |
|--------------|---------------------------|----------------------|---------------------|----------------------|---------------------|----------------------|---------------------|----------------------|---------------------|------------|
| | | 1 st Year | | 2 nd Year | | 3 rd Year | | 4 th Year | | |
| | | 1 st Sem | 2 nd Sem | 3 rd Sem | 4 th Sem | 5 th Sem | 6 th Sem | 7 th Sem | 8 th Sem | |
| 1 | Program Core | 4 | 7 | 7 | 15 | 16 | 5 | 8 | | 62 |
| 2 | Program Electives | | | | | 3 | 3 | 6 | 3 | 15 |
| 3 | Open Electives | | | | | | 3 | 3 | 3 | 9 |
| 4 | Applied Sciences | 9 | 5 | 4 | | | | | | 18 |
| 5 | Humanities | 2 | | | | | 3 | | | 5 |
| 6 | Summer Training & Project | | 1 | 1 | 1 | 1 | 2 | 3 | 14 | 23 |
| 7 | Allied Engineering | 5 | 7 | 8 | 4 | | 4 | | | 28 |
| Total | | 20 | 20 | 20 | 20 | 20 | 20 | 20 | 20 | 160 |

Teaching Scheme

Semester I

| Sl. No. | Course Code | Course Title | L | T | P | Credits |
|---------------|-------------|---|----|---|---|---------|
| 1. | PHL 102 | Electrical Engineering Materials | 3 | 0 | 0 | 3 |
| 2. | EEB 102 | Basic Electrical Engineering | 3 | 0 | 2 | 4 |
| 3. | MEB 162 | Engineering Visualization | 3 | 0 | 2 | 4 |
| 4. | MAL 101 | Advanced Calculus | 3 | 1 | 0 | 4 |
| 5. | MEP 121 | Product Design and Realization Laboratory | 0 | 0 | 2 | 1 |
| 6. | HML 101 | Communication Skills | 2 | 0 | 0 | 2 |
| 7. | EVL 101 | Environmental Sciences | 2 | 0 | 0 | 2 |
| Total Credits | | | 16 | 1 | 6 | 20 |

Semester II

| Sl. No. | Course Code | Course Title | L | T | P | Credits |
|---------------|-------------|---|----|---|---|---------|
| 1. | MAL 153 | Ordinary Differential Equation and Transforms | 3 | 1 | 0 | 4 |
| 2. | EEL 151 | Network Analysis | 3 | 0 | 0 | 3 |
| 3. | CSB 181 | Problem Solving and Computer Programming | 3 | 0 | 2 | 4 |
| 4. | MEL 151 | Engineering Mechanics | 3 | 0 | 0 | 3 |
| 5. | EEB 152 | Electrical Workshop | 3 | 0 | 2 | 4 |
| 6. | EVP 102 | Nature and Care | 0 | 0 | 2 | 1 |
| 7. | EEP153 | Project | 0 | 0 | 2 | 1 |
| Total Credits | | | 15 | 1 | 8 | 20 |

NOTE: Summer Training (6-8 Weeks) is mandatory for each student to continue the program and the evaluation will take place in the Semester-III.

Semester III

| Sl. No. | Course Code | Course Title | L | T | P | Credits |
|---------------|-------------|--|----|---|---|---------|
| 1. | MAB 203 | Numerical & Engineering Optimization Methods | 3 | 0 | 2 | 4 |
| 2. | CSB 231 | Data Structures | 3 | 0 | 2 | 4 |
| 3. | EEL 201 | Electro Magnetic Field Theory | 3 | 1 | 0 | 4 |
| 4. | ECB 207 | Electronic Devices and Circuits | 3 | 0 | 2 | 4 |
| 5. | EEB 202 | Signal & Systems | 3 | 0 | 0 | 3 |
| 6. | EEP 203 | Summer Training -I | 0 | 0 | 2 | 1 |
| Total Credits | | | 15 | 1 | 8 | 20 |

Semester IV

| Sl. No. | Course Code | Course Title | L | T | P | Credits |
|---------------|-------------|--------------------------------------|----|---|----|---------|
| 1. | EEB 251 | Electrical Machines-I | 3 | 0 | 2 | 4 |
| 2. | EEB 252 | Control Systems | 3 | 0 | 2 | 4 |
| 3. | EEL 253 | Power Transmission and Distribution | 3 | 0 | 0 | 3 |
| 4. | ECB 206 | Digital Electronics and Logic Design | 3 | 0 | 2 | 4 |
| 5. | EEB 254 | Electrical Measurements | 3 | 0 | 2 | 4 |
| 6. | EEP 255 | Project | 0 | 0 | 2 | 1 |
| Total Credits | | | 15 | 0 | 10 | 20 |

NOTE: Summer Training (6-8 Weeks) is mandatory for each student to continue the program and the evaluation will take place in the Semester-V.

Semester V

| Sl. No. | Course Code | Course Title | L | T | P | Credits |
|---------------|-------------|--------------------------------------|----|---|---|---------|
| 1. | EEB 301 | Electrical Machines-II | 3 | 0 | 2 | 4 |
| 2. | EEL 302 | Power System Analysis | 3 | 1 | 0 | 4 |
| 3. | EEL XXX | Elective-I | 3 | 0 | 0 | 3 |
| 4. | EEB 303 | Microprocessors and Microcontrollers | 3 | 0 | 2 | 4 |
| 5. | EEB 304 | Power Electronics | 3 | 0 | 2 | 4 |
| 6. | EEP 305 | Summer Training -II | - | - | - | 1 |
| Total Credits | | | 15 | 1 | 6 | 20 |

Semester VI

| Sl. No. | Course Code | Course Title | L | T | P | Credits |
|---------------|-------------|--|----|---|----|---------|
| 1. | EEB 351 | Electric Drives | 3 | 0 | 2 | 4 |
| 2. | EEP 352 | Electrical Simulation Lab | 0 | 0 | 2 | 1 |
| 3. | CSB 310 | Artificial Intelligence & Machine Learning | 3 | 0 | 2 | 4 |
| 4. | HML 352 | Engineering Economics and Accountancy | 3 | 0 | 0 | 3 |
| 5. | EEL 3XX | Elective-II | 3 | 0 | 0 | 3 |
| 6. | | Open Elective-I | 3 | 0 | 0 | 3 |
| 7. | EEP 353 | Project | 0 | 0 | 4 | 2 |
| Total Credits | | | 15 | 0 | 10 | 20 |

NOTE: Summer Training (6-8 Weeks) is mandatory for each student to continue the program and the evaluation will take place in the Semester-VII.

Semester VII

| Sl. No. | Course Code | Course Title | L | T | P | Credits |
|---------------|-------------|-------------------------|----|---|---|---------|
| 1. | EEL 401 | HVDC & FACTS | 3 | 0 | 0 | 3 |
| 2. | EEL 402 | Switchgear & Protection | 3 | 1 | 0 | 4 |
| 3. | EEL 4XX | Elective-III | 3 | 0 | 0 | 3 |
| 4. | EEL 4XX | Elective-IV | 3 | 0 | 0 | 3 |
| 5. | | Open Elective-II | 3 | 0 | 0 | 3 |
| 6. | EEP 403 | Power System Lab | 0 | 0 | 2 | 1 |
| 7. | EEP 404 | Summer Training -III | 0 | 0 | 2 | 1 |
| 8. | EEP 405 | Project Work | 0 | 0 | 4 | 2 |
| Total Credits | | | 15 | 1 | 8 | 20 |

Semester VIII

| Sl.No. | Course Code | Course Title | L | T | P | Credits |
|---------------|-------------|----------------------------|---|---|---|---------|
| 1 | EEL 4XX | MOOCs (Program Elective-5) | 3 | 0 | 0 | 3 |
| 2 | XXX XXX | MOOCs (Open Elective-3) | 3 | 0 | 0 | 3 |
| 3 | EEP 451 | Project Report | - | - | - | 14 |
| Total Credits | | | 6 | 0 | 0 | 20 |

Department Elective Courses of Specialization in Major Degree of Electrical Engineering

Bouquet 1 of Department Elective Courses

[Specialization in **Reliability Engineering** with B. Tech. (EE)]

Course Structure:

| S. No. | Elective No. | Course Code | Course Name | L | T | P | Credits |
|--------|--------------|-------------|--|---|---|---|---------|
| 1. | Elective 1 | EEL 306 | Reliability Distributions | 3 | 0 | 0 | 3 |
| 2. | Elective 2 | EEL 354 | Reliability Modeling | 3 | 0 | 0 | 3 |
| 3. | Elective 3 | EEL 406 | Design for Reliability | 3 | 0 | 0 | 3 |
| 4. | Elective 4 | EEL 407 | Reliability Testing and Physics of Failure | 3 | 0 | 0 | 3 |
| 5. | Elective 5 | EEL 452 | Power System Reliability | 3 | 0 | 0 | 3 |

Bouquet 2 of Department Elective Courses

[Specialization in **Power Electronics** with B. Tech. (EE)]

Course Structure:

| S. No | Elective No | Course Code | Course Name | L | T | P | Credits |
|-------|-------------|-------------|--|---|---|---|---------|
| 1. | Elective 1 | EEL 307 | Solid State Power Controllers | 3 | 0 | 0 | 3 |
| 2. | Elective 2 | EEL 355 | Switched Mode Power Conversion | 3 | 0 | 0 | 3 |
| 3. | Elective 3 | EEL 408 | Special Electrical Machines | 3 | 0 | 0 | 3 |
| 4. | Elective 4 | EEL 409 | DSP and its Application to Power Electronics | 3 | 0 | 0 | 3 |
| 5. | Elective 5 | EEL 453 | Inverters and Resonant Pulse Converters | 3 | 0 | 0 | 3 |
| 6. | | EEL 454 | Power Electronics For Renewable Energy Systems | 3 | 0 | 0 | 3 |

Bouquet 3 of Department Elective Courses

[Specialization in **Renewable Energy Systems** with B. Tech. (EE)]

Course Structure:

| S. No. | Elective No | Course Code | Course Name | L | T | P | Credits |
|--------|-------------|-------------|--|---|---|---|---------|
| 1. | Elective 1 | EEL 308 | Solar Energy Technology | 3 | 0 | 0 | 3 |
| 2. | Elective 2 | EEL 356 | Electric vehicles | 3 | 0 | 0 | 3 |
| 3. | Elective 3 | EEL 303 | Energy Storage Systems | 3 | 0 | 0 | 3 |
| 4. | Elective 4 | EEL 410 | Smart Grid | 3 | 0 | 0 | 3 |
| 5. | | EEL 411 | Grid Integration of Renewable Energy | 3 | 0 | 0 | 3 |
| 6. | | EEL 412 | Electrical Distribution System Analysis | 3 | 0 | 0 | 3 |
| 7. | Elective 5 | EEL 455 | Wind Energy Conversion Systems | 3 | 0 | 0 | 3 |
| 8. | | EEL 456 | IoT Applications in Renewable Energy Systems | 3 | 0 | 0 | 3 |

Bouquet 4 of Department Elective Courses[Specialization in **Instrumentation and Biomedical Signal Processing** with B. Tech. (EE)]**Course Structure:**

| S. No. | Elective No | Course Code | Course Name | L | T | P | Credits |
|--------|-------------|-------------|---|---|---|---|---------|
| 1. | Elective 1 | EEL 309 | IoT and Advanced applications in healthcare | 3 | 0 | 0 | 3 |
| 2. | Elective 2 | EEL 357 | Sensor design and system development | 3 | 0 | 0 | 3 |
| 3. | Elective 3 | EEL 413 | Advanced Biomedical instrumentation | 3 | 0 | 0 | 3 |
| 4. | Elective 4 | EEL 414 | Biomedical image processing | 3 | 0 | 0 | 3 |
| 5. | | EEL 415 | Biomedical instruments and data interpretation | | | | |
| 6. | | EEL 416 | Optical Fibers | 3 | 0 | 0 | 3 |
| 7. | Elective 5 | EEL 458 | Artificial intelligence in biomedicine and healthcare | 3 | 0 | 0 | 3 |
| 8. | | EEL 459 | Virtual bio instrumentation | 3 | 0 | 0 | 3 |

Bouquet 5 of Department Elective Courses[Specialization in **Control and Automation** with B. Tech. (EE)]**Course Structure:**

| S. No. | Elective No. | Course Code | Course Name | L | T | P | Credits |
|--------|--------------|-------------|--|---|---|---|---------|
| 1 | Elective 1 | EEL 310 | Modern Control Systems | 3 | 0 | 0 | 3 |
| 2 | Elective 2 | EEL 358 | Digital Control Engineering | 3 | 0 | 0 | 3 |
| 3 | Elective 3 | EEL 417 | Control System Components | 3 | 0 | 0 | 3 |
| 4 | Elective 4 | EEL 418 | Automation and Robotics | 3 | 0 | 0 | 3 |
| 5 | Elective 5 | EEL 460 | Optimal Control | 3 | 0 | 0 | 3 |
| 6 | | EEL 461 | System Identification and Adaptive Control | 3 | 0 | 0 | 3 |

Bouquet 6 of Department Elective Courses[Specialization in **Power System Engineering** with B. Tech. (EE)]**Course Structure:**

| S. No. | Elective No. | Course Code | Course Name | L | T | P | Credits |
|--------|--------------|-------------|---|---|---|---|---------|
| 1 | Elective 1 | EEL 311 | Power System Deregulation | 3 | 0 | 0 | 3 |
| 2 | Elective 2 | EEL 359 | Power System Operation & Control | 3 | 0 | 0 | 3 |
| 3 | Elective 3 | EEL 419 | Modeling and Simulation of Modern Power Systems | 3 | 0 | 0 | 3 |
| 4 | Elective 4 | EEL 420 | Computer Applications in Power Systems | 3 | 0 | 0 | 3 |
| 5 | Elective 5 | EEL 462 | Power System Stability & Control | 3 | 0 | 0 | 3 |

| 4. | Title | Electrical Workshop: Safety, Commissioning, Maintenance & Testing of Electrical Equipment | | | |
| | Author | R.P. Singh | | | |
| | Publisher | wiley | | | |
| | Edition | 3rd | | | |

| | |
|-----------------------|--|
| <p>Content</p> | <p>Electrical Wiring: I.E. rules on electrical wiring. Types of domestic and industrial wirings. Study of wiring accessories e.g. switches, fuses, relays, MCB, ELCB, MCCB etc. Joints in electrical conductors. Measurement of conductor size using SWG and micrometer. Grading of cables and current ratings. Principle of laying out of domestic wiring. Voltage drop concept. PVC conduit and Casing capping wiring system. Different types of wiring - Power, control, Communication and entertainment wiring. Wiring circuits planning, permissible load in subcircuit and main circuit. Estimation of load, cable size, bill of material and cost. Inspection and testing of wiring installations. Special wiring circuit e.g. godown, tunnel and workshop etc.</p> <p>Batteries and solar cell: Chemical effect of electric current and Laws of electrolysis. Explanation of Anodes and cathodes. Types of cells, advantages / disadvantages and their applications. Lead acid cell: Principle of operation and components. Types of battery charging, Safety precautions, test equipment and maintenance. Grouping of cells for specified voltage and current. Principle and operation of solar cell.</p> <p>Electrical Earthing: Importance of Earthing. Plate earthing and pipe earthing methods and IEE regulations. Earth resistance by earth tester / megger. Earth leakage by ELCB and relay.</p> <p>Electrical illumination: Laws of Illuminations. Types of illumination system. Illumination factors, intensity of light. Type of lamps, advantages/ disadvantages and their applications. Calculations of lumens and efficiency.</p> <p>Experiments:</p> <ol style="list-style-type: none"> 1. Make simple straight twist and rat-tail joints in single strand conductors, married and "T" (Tee) joint in stranded conductors, Britannia straight and "T" (Tee) joint in bare conductors, straight joint in different types of underground cables. 2. Measure insulation resistance of underground cable. 3. Determine the internal resistance of cell and make grouping of cells. 4. Carry out installation and maintenance of batteries. Determine total number of cells required for a given power requirement. 5. Plan work in compliance with solar panel installation norms. Combination of solar cells for given power requirement. Assemble and install solar panel. Check the functionality of solar panel. 6. Prepare and mount the energy meter board. Draw and wire up the consumers main board with ICDP switch and distribution fuse box. Draw and wire up a bank/hostel/jail in PVC conduit. 7. Identify the types of fuses their ratings and applications. Identify the parts of a relay, MCB & ELCB and check its operation. |
|-----------------------|--|

| | |
|--------------------------|---|
| | <p>8. Estimate the cost of material for wiring in PVC channel for an office room having 2 lamps, 1 Fan, one 6A socket outlet and wire up.</p> <p>9. Estimate the requirement for conduit wiring (3 phase) and wire up. Estimate the materials and wire up the lighting circuit for a godown. Estimate the materials and wire up a lighting circuit for a corridor in conduit.</p> <p>10. Test, locate the fault and repair a domestic wiring installation.</p> <p>11. Install the pipe and plate earthing and test it. Measure the earth electrode resistance using earth tester. Carry out earth resistance improvement.</p> |

| | Author | | Turan Gonen | | |
| | Publisher | | Mc. Graw-hill | | |
| | Edition | | | | |
| Content | Introduction: General Structure of Electrical Power System- Introduction to Power System, Generation, Transmission, Distribution and Utilization- Overview | | | | |

| | |
|--------------------------|---|
| | <p>Single Line Diagram representation.</p> <p>Transmission of Electrical Power: Brief introduction to AC and DC transmission systems. AC Transmission line parameters: Types of conductors – ACSR, Bundled and Stranded conductors- Skin Effect- Calculation of inductance and capacitance for single phase and three phase, Single and double circuit lines, Concept of GMR & GMD, Symmetrical and asymmetrical conductor configuration with and without transposition. Effect of ground on Capacitance.</p> <p>Performance of AC transmission line: Short, Medium and Long lines and their exact equivalent circuits- Nominal-T, Nominal-π. Regulation and Efficiency of transmission lines. Long transmission line-Rigorous solution. A, B, C, D parameters of transmission lines. Surge impedance and Surge impedance loading - Wavelengths and Velocity of propagation, Ferranti effect.</p> <p>Mechanical design of transmission lines: Overhead line insulators: Types of Insulators, String efficiency and methods for improvement. Phenomenon of corona, Factors affecting corona.</p> <p>Distribution of Electric power: Classification of distribution systems, DC and AC distribution systems, Underground and Overhead Distribution Systems. Design considerations of distribution feeders: Radial and loop, Primary feeders, Voltage levels, Feeder loading.</p> |

| | | |
|--------------------------|--|--------------------|
| | Edition | Third Edition 2003 |
| Content | <p>Number system and codes: Analog versus digital, merits of digital system, number systems, base conversions, complements of numbers weighted and unweighted codes and error detecting and correcting codes, Alpha numeric code (ASCII), Error detecting and correcting codes.</p> <p>Switching algebra and switching functions: Boolean algebra, postulates, theorems and switching algebra, completely and incompletely specified switching functions, Representation of Boolean functions in sum of products form and product of sums form, minimization of Boolean functions using Karnaugh map and Quine McCluskey methods. Problem solving.</p> <p>Combinational logic circuits: Logic gates, Logic gates operation using discrete components, Universal Logic gates, Logic design of combinational circuits: adders, Code converters, Comparators, multiplexers, de-multiplexers, encoders, decoders, buffers, tri-state buffers.</p> <p>Logic Families: Transistor as an inverter/switch. Classification of logic families and their developments. TTL NAND gate analysis, ECL and CMOS logic family. Comparison TTL CMOS and ECL logic families.</p> <p>Flip-Flops: RS Flip flop, Clocked RS flip-flop, JK flip-flop, T-flip-flop, JK flip-flops and M/S JK flip flop, Conversion of flip-flops.</p> <p>Registers: Buffer Register, Controlled buffer register, Shift Registers (Left shift and Right shift register), Universal shift register: SISO, SIPO, PISO, PIPO, Ring counter and twisted ring counter</p> <p>Counters: Design of Asynchronous and Synchronous counters.</p> <p>Comparators & Converters: Basic comparator & its characteristics, zero crossing detector, voltage limiters, clippers & clampers, small signal half wave & full wave rectifiers, absolute value detectors, sample and hold circuit.</p> | |
| Course Assessment | <p>Theory: Continuous Evaluation 25% Mid Semester 25% End Semester 50% Lab: Continuous Evaluation 50% End Semester 50%</p> <p>60% weightage to theory and 40 % weightage to laboratory for overall grading</p> | |

| Prerequisite course code as per proposed course numbers | | | | | |
| Prerequisite Credits | | | | | |
| Equivalent course codes as per proposed course and old course | | | | | |
| Overlap course codes as per proposed course numbers | -- | | | | |
| Text Books: | | | | | |
| 1. | Title | Fundamentals of power system protection | | | |

| | | |
|----------------|---|--|
| | Author | Y. G. Paithankar and S. R. Bhide |
| | Publisher | Prentice Hall |
| | Edition | |
| 2. | Title | Switchgear and Power System Protection |
| | Author | Ravindra P.Singh |
| | Publisher | PHI Learning Private Ltd |
| | Edition | |
| 3. | Title | Power System Protection and Switchgear |
| | Author | Badri Ram, D N Vishwakarma |
| | Publisher | TMH |
| | Edition | |
| Content | <p>Introduction:</p> <p>fuse characteristics, types of fuses, application of HRC fuses, discrimination Overvoltage Protection and Insulation Coordination: Over voltage due to arcing ground and Peterson coil, lightning, horn gaps, surge diverters, rod gaps, expulsion type lightning arrester, valve type lightning arrester, ground wires, ground rods, counter poise, surge absorbers, insulation coordination, volt-time curves.</p> <p>Protective Relays:</p> <p>Evolution of protective relays, zones of protection, primary and backup protection, essential qualities of protection, classification of protective relays and schemes, current transformers, potential transformers, basic relay terminology.</p> <p>Operating Principles of Protective Relays:</p> <p>Electromagnetic relays, thermal relays, static relays, Amplitude and Phase comparators, Duality between AC and PC, Static amplitude comparator, integrating and instantaneous comparators, static phase comparators, coincidence type of phase comparator, introduction to microprocessor based protective relays.</p> <p>Over-current Protection:</p> <p>Time-current characteristics, current setting, over current protective schemes, directional relay, protection of parallel feeders, protection of ring mains, Phase fault and earth fault protection, Combined earth fault and phase fault protective scheme, Directional earth fault relay.</p> <p>Distance Protection:</p> <p>Impedance relay, reactance relay, MHO relay, input quantities for various types of distance relays, Effect of arc resistance, Effect of power swings, effect of line length and source impedance on the performance of distance relays, selection of distance relays, MHO relay with blinders, Reduction of measuring units, switched distance schemes, auto re-closing.</p> <p>Pilot Relaying Schemes:</p> <p>Wire Pilot protection, Carrier current protection.</p> <p>AC Machines and Bus Zone Protection:</p> <p>Protection of Generators, Protection of transformers, Bus-zone protection, frame leakage protection.</p> | |

| | |
|--------------------------|---|
| | <p>Static Relays:</p> <p>Static over current relays, static directional relay, static differential relay, static distance relays, and Multi input comparators, concept of Quadrilateral and Elliptical relay characteristics.</p> <p>Circuit Breakers:</p> <p>Introduction, arcing in circuit breakers, arc interruption theories, re-striking and recovery voltage, resistance switching, current chopping, interruption of capacitive current, oil circuit breaker, air blast circuit breakers, SF6 circuit breaker, operating mechanism, selection of circuit breakers, high voltage d.c. breakers, ratings of circuit breakers.</p> |
| Course Assessment | Theory: Continuous Evaluation 25% Mid Semester 25% End Semester 50% |
